pgsql Release Notes

pgsql-1.4.0

- The conn:escape() function has been replaced by conn:escapeString().

- The conn:unescapeBytea() function has been added.

pgsql-1.4.1

- OIDs used by the interface are hardcoded in luapgsql.h, it is no longer necessary to have the PostgreSQL server development headers installed.

pgsql-1.4.2

- Updated rockspec.

- Numbers and boolean values are sent in the binary format, +/- Infinity and NaN are now correctly handled.

pgsql-1.4.3 (not yet released)

- Added a non-scm rockspec.

- Better error handling in out of memory conditions.

- Bug fixes.

- Return an error instead of segfaulting when a connection object is reused on which :finish() had previously been called.

pgsql-1.4.4 (not yet released)

- Add conn:trace() and conn:untrace functions.
